Agra, Uttar Pradesh

EXPERIENCE

TEAM ERP

Backend Developer Intern

June 2024- Present

Ghaziabad, Uttar Pradesh

- KIET ERP is an in-house ERP system for our college completely managed and developed by students. This gave me a good software development background including design patterns, data structures, analyzing data in reports, and test-driven development. I also had a good experience working in a team and handling responsibilities with deadlines.
- Working on various projects using various coding methodologies.
- Develop a User-friendly hospital management system, grievance redressal system.
- Handle the Database and created backend using **Django, Django Rest Framework, MySQL**.

PROJECTS

CampusCare | Django, MySQL, phpMyAdmin

- * Developed backend for Hostel Grievance Management System to streamline complaint resolution.
- * Enabled hostel residents to submit grievances related to facilities and services.
- * Implemented a multi-level grievance management system for efficient issue resolution.
- * Designed a tracking system to monitor complaint status and assign responsible personnel.
- * Improved accountability and transparency in grievance handling.

VitalCure | Django, MySQL, phpMyAdmin

- * Developed backend for complete project.
- * Hospital management system with role-based registration, login and authorization.
- * Patient can book appointments, doctor can accept it or reject it.
- * Doctor can give prescription on website and it will be mailed to patient.

Certificate Generator | Django, MySQL, phpMyAdmin

- * Developed backend for complete project.
- * A python project which generates as many as certificates by only giving template and data and their desired locations for data.
- * User can customize font and colors.
- * Handles data in CSV and excel format.
- * Automatically generates zip for all the generated certificates.

WhatsApp Scrappy | Puppeteer, JavaScript, Node.JS

- * A web scraping tool, which scraps WhatsApp chats.
- * Tool which scraps with auto page initiation.

TECHNICAL SKILLS

Languages: Python, C, C++ HTML/CSS, JavaScript, SQL

Technologies/Frameworks: Django, Django REST Framework, Linux, GitHub, MySQL

Development: Backend web development and basic Frontend web development.

ACHIEVEMENTS

- * Track Winner in **NASA Space Apps Challenge 2025**.
- * Reached Finals in **IEEE-SSH Challenge 2024**.
- * Solved **300+** Problems on **Leetcode**.
- * Solved **100+** Problems across **GeeksforGeeks**.
